Testimonials:

"I thought the IVF class was informative and concise. Even though I had been through numerous fertility treatments elsewhere (including IVF), I learned valuable information from the presentation. I appreciated hearing more about the research on IVF, including research conducted at UCLA. At other clinics, I was given only the most cursory explanation of what was going to happen and why. I appreciate that the doctors at UCLA want patients to understand the reasoning behind the fertility treatment decisions. I appreciated that a little humor was inserted into the presentation as well! It brought some levity to an emotionally difficult topic."
